c. Plug the USB flash disk into Mini PC, and connect a keyboard.

d. Press the power button and press F7 or Delete continuously to enter into boot menu. Select your USB flash disk to reinstall Windows8.1. There is no need to install drive separately with the install img provided by us.

P.	lease select boot device:
UEFI:	Built-in EFI Shell
Windou	us Boot Manager
UEFI:	Teclast CoolFlash 1100
Enter	Setup
Ť	and ↓ to move selection
ENT	TER to select boot device
ES	SC to boot using defaults

e. Mini PC will shutdown while the install process finished. Plug out the USB flash disk, then press power button to power on your Mini PC.

12. How to install BIOS?

a. Prepare the BIOS files in root the direction of your USB flash disk. Don't rename any files.

b. Open your USB flash disk, Click File ->Click Open Command Prompt as administrator.

c. Type bios and Press Enter to start installing.

d. MiniPC will restart after the install process finished.

Notice: Install a wrong BIOS or the Power is cut off during BIOS installing will erase your windows KEY or make MiniPC to brick. We suggest you don't install BIOS when your Windows is activated.
